

Paediatric Occupational Therapy for Functional Skills and Motor Co-ordination

The CCICP Paediatric Occupational Therapy service includes support for functional skill and motor skill difficulties. This aspect of the service is a tiered service consisting of Universal, Targeted and Specialist Tiers.

Universal Tier

The universal tier can be accessed on our website using the QR code. The website provides universal advice and strategies to support the child/young person.

Targeted Tier

If the child/young person continues to display difficulties with functional skills and/or motor co-ordination, after a minimum of **12 weeks strategy implementation**, Paediatric Occupational Therapy referrals can be made, to access the targeted tier of our service.

Please consider that children/ young people should only be referred if they are able to engage in the assessment process. The targeted tier involves a parent/carer telephone appointment.

Please be aware, that our service only accepts referrals for **children up to 16 years** of age and in full time education (end of year 11).

Referrals can be made by School SENDCOs and Health Professionals, via our website. Evidence of 12 week strategy implementation at universal tier level, is required for targeted tier referrals to be accepted. The diary/evidence sheet, is also available on our website. After submitting the referral form, the diary sheet should be emailed as supporting information to ccicp.therapyservices@mcht.nhs.uk.

Specialist Tier

Following completion of the universal and targeted tier, the Occupational Therapist may offer specialist tier intervention. This is likely to involve a clinic assessment appointment and could include standardised assessments, such as motor skills and handwriting assessments, as clinically indicated.

Further universal advice and discussion is available to parent/carers, health professionals and education professionals via the **Paediatric Occupational Therapy Advice Line**. This is open from 12pm to 2pm every Wednesday during term time, 07584 386880.
